To enable me to discover what career I wish to enter into

Change career

I was bored during lockdown

i could still live at home and do the course i liked

How do you think the course you are currently studying will help you to improve your ability to make a difference to other people and/or the environment?

Please write your answer in the box below

The course I am currently studying will allow to become a paramedic and help members of the public in a day to day basis which is something I have always wanted to do

I believe this course has set me up well for the future because I have a greater knowledge of multiple subjects now as well as 2 qualifications from UOW.

I don't think it has

This course will allow me to improve people skills and help out people regain their health

My course will allow me to proceed into becoming a solicitor.

Teaching is very important in society

I believe that it would improve my skills and allows me to understand how working in a team makes a big difference outside (when I start working) in the future job I want to do and how it'll help those in need

My course is based on making a difference to individuals, so i think it will be very helpful.

The course i'm studying will allow me to gain the skills and knowledge of a variety of nursing backgrounds to support people with their physical and mental health.

Implementing what I have learnt

I am studying to be a teacher and therefore i would hope that I have a positive influence on my future pupils.

It is very important for making differences in both areas as it is future journalists job to spread news and draw attention to both social and environmental issues

My course allows me to develop a greater understanding around children with disabilities, giving me a passion to support children and their families as this support seems to be something that is currently lacking in society.

i will be able to help people with their mental health problems and make changes to the environment around us such as social media and public places to reduce mental health issues.

Training to be a teacher will put me in a position to make a difference in young pupils lives and to the colleagues around me. Already I have felt I have made a positive impact in my placement schools.

It will more so help myself and the job that I want to do as I believe it will make me stand out more than other applicants when applying for jobs

Learning historical concepts Being at the forefront of knowledge

I will able to help people when injured to become better

I will be able to help people rehabilitate injuries or regain mobility and function which is vital to people in regards to having their own dignity and independence and being able to restore some ones liberty is another major motivating factor.

It is inspiring me and teaching me how to make a difference in the competitive field of sports management.

Help people with mental illnesses to live a better life

it can make me better in management skill

How do you think the course you are currently studying will help you to improve your ability to make a difference to other people and/or the environment?

Please write your answer in the box below

Will boost my employability skills for future career options and enable me to gain experience in relating fields

My course is Early Years Education Pathway, My current course is directly impacting different pedagogy practice for Early years childhood education. By the time I finish my course I am loaded with different knowledge, pedagogy practice to teach the young learners, Also specific ideas and knowledge has been gathered to change Early Years Childhood Education in my Country. At anytime I am to set up Early Years Education school I have gathered knowledge how to make the environment mostly interesting one for learning development skills.

will help others

The course I'm studying will lead me into a nhs job which provides opportunities to change peoples lives and hopefully I can make a difference.

I want to share my culture and to potentially raise vocations.

I am studying business management, and we have already briefly touched on sustainability in businesses. Going into my second and third year, sustainability is something I will be able to focus more on and use that knowledge to help a business I end up working for become more sustainable.

The course is about promoting social change, development, and well-being of people, helping the most vulnerable members in the society.

Will give me the experience needed to help develop sportsman/women using analysis

Give me the knowledge and understanding to help children in their learning.

My course will help me in paying attention and give listening ears, particularly to vulnerable people who are denied basic care and support. it will help me deliver excellent and professional service in supporting and assisting people which will subsequently impact my immediate and extended environment.

To challenge myself and improve my chances of getting a job

It is a great course that will allow me to help people with different needs, preferences or impairments.

helping other people as i'll be working in healthcare

Being knowledgeable on the subject of health issues

I am doing a research project on allotment gardening - I hope it will help demonstrate the importance of such spaces

its demanding! I have seen some cases despite taking the courses they lack sense of morals and going against NMC code. not only the course it should be me who follows what I've learned to make a difference in other people.

Will give me the qualifications needed

I currently study part time and I hope to develop my ways of thinking to help further my impact in my role as an HR Manager.

I will be able to help people once I am qualified

I will be able to help people manage a long term illness, injury or maintain their physical health

more awareness of what damages the commercial sectors do to the environment.

To back up academically my experience

Applying knowledge gained from the foundation degree will improve practice and make a difference to children and family outcomes.

Writing skills will help me advocate for causes

Well

Yes

How do you think the course you are currently studying will help you to improve your ability to make a difference to other people and/or the environment?

Please write your answer in the box below

It allows me to understand people and why they do what they do, allowing me to help them

Forensic Science is important to the pursuit of justice in this country, and I truly believe I can make a difference by learning how to contribute to the law by engaging in it.

I belong to Chitral, one of the backward areas of Pakistan. Girls are considered second creator born to serve their parents before marriage and then their husbands. They are computer illiterate and Education is very less. After completing my degree from abroad I will be back to my home town and serve the girls on the path of Education.

Yes, I have a leadership module during my course

Hopefully benefit the children at my setting

I am studying the Return to Practice - Nursing. Working as a nurse again will give me a huge opportunity to work back in the NHS and make a difference to sick and scared children and families.

Studying forensic psychology has given me a desire to go into a career aimed at aiding victims of crimes, and to help the treatment of offenders so that they do not reoffend. This would allow me to make a positive difference to people who have experienced hardships in life, and as a result have been a victim of, or a perpetrator, of crime.

It will help me through the power to generate creativity while analysing different projects, case studies, etc. thereby enhancing my knowledge to make a positive difference in a society or a community

Widen my knowledge, become more diverse and to care for women with compassion and empathy.

I get the chance to positively impact and teach all walks of life

I can understand how and why authors and playwrights wrote certain things. Through this analysis I can learn how it affects the readers or how it reflects on society as a whole.

Understand more about HR where I want to work

It's geography

This course has helped me to improve my English and way of thinking. It gives me the opportunity to gain connections and learn new skills.

It will allow me to give me people legal knowledge for them to use to gain from

Would be able to help out in police sections

I want to become a teacher to make a difference to children's lives and make the school environment a cleaner happier place

Helping athletes person better

Studying a law degree goes hand in hand with helping people. We are being trained to become the best advocates for any future clients which we may encounter.

just will want it

I intend to help people by getting a degree in psychology.

Ability. To do life changing research

By Helping families with their problems

I will be qualified in a helping profession

Criminology will apply me with the skills to make the world a safer place by understanding crime and applying safety measures for those that can be affected by crime.

It will allow me to gain a deeper understanding of nursing so that I can relate theory to practice to make patients experiences of care, more positive. Allow me to gain more experience in other health and social care settings

How do you think the course you are currently studying will help you to improve your ability to make a difference to other people and/or the environment?

Please write your answer in the box below

it has already given me the necessary knowledge and professional membership to a relevant body so I am already making a difference to people's quality of life and wellbeing

I want to teach so I want to help teach the students in a way which means they can achieve anything they want.

working in health care for five years i wanted to expand my knowledge and skills, so i wanted to apply for nursing i also feel there there is a high chance of employment after my corse ends

I will hopefully be able to teach and improve other people's education and give them a better experience and more hope for their future.

Help dick people as a registered nurse

My course is giving me the skills and knowledge, which will educate me on how to make a difference to others. I am constantly learning to be considerate of others and my environment.

studying sociology will improve my ability to make a difference to other people by gaining an understanding and a foundation of knowledge to make an informed stand for change in society about societal issues.

Upon qualifying as a nurse I would be helping people day in and day out

To be able to support the children further in my school.

Leads me to a job in which i help people

help me help people

Nursing will help other people

I will have better knowledge of my subject and therefore will be able to teach better

To help me develop the knowledge I already know

I think it will allow me to pursue a career in medical research which will, in turn, help people struggling with certain diseases that may currently not be treatable.

It will develop my understanding of inclusive practice which I can then use to support the children in my setting and in turn help to make a difference.

My course involves learning of coaching practices and techniques which I can then apply to my coaching and help to improve sports skills in others. Leading to a help promote a better healthy lifestyle for all.

Teaching is a job that will forever support children and their parents.

Not applicable

Help people in need

Through studying nursing I hope to be able to make a positive difference to and have a positive impact on the lives of both young people and their families in relation to their holistic health and wellbeing. Additionally, studying nursing will give me the opportunity to encourage public health promotion, e.g. smoking prevention, which will help to improve the overall state and health of the environment.

by improving my art skills I hope to reach out to people.

I am doing teacher training, so I hope I will learn how to help children achieve their potential

I am doing research related to gender, sports and physical activity. My research will help women arouse their health consciousness and get more women engaged in sports and physical activity, hence women will both enjoy a better social and physical wellbeing.

I think the course I'm currently study will very much help me make a difference in other peoples lives and environments

I endeaver to make a positive impact on the improvment of peoples lives as i am studying nursing.

Thinking of your time at your current place of study or apprenticeship, have any of the following skills and knowledge been covered in the teaching you've experienced so far?

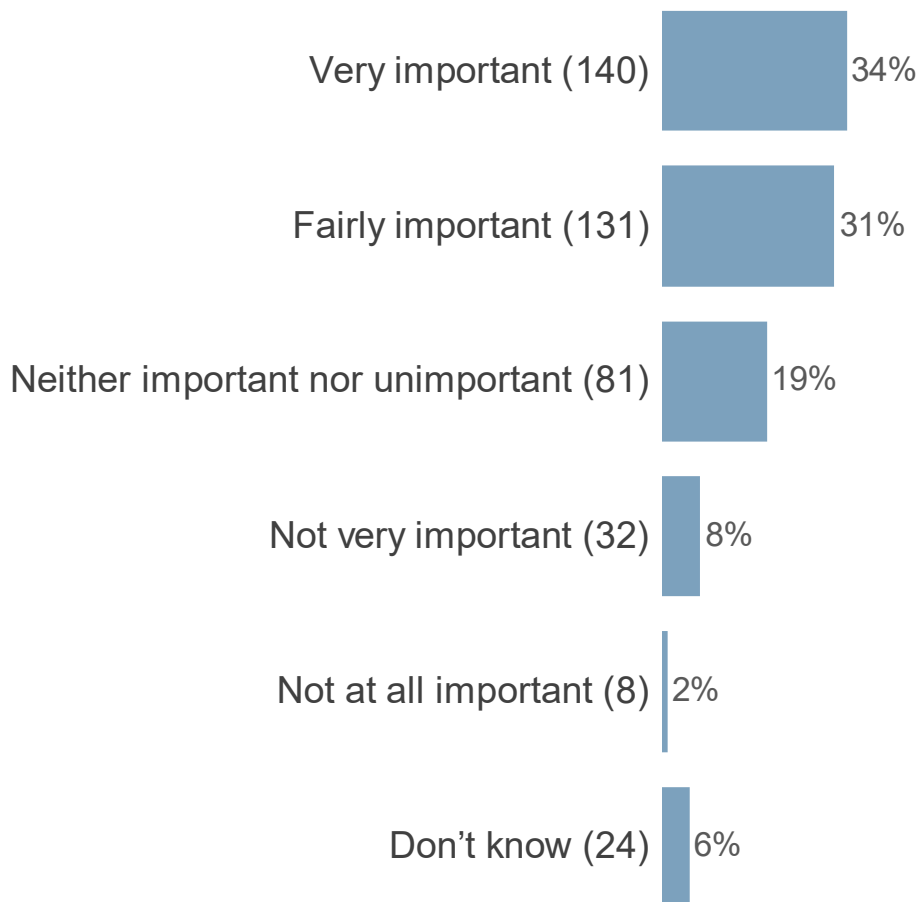

Select all that apply

And how important to you personally is learning these skills, attributes and knowledge during your time at your current place of study or apprenticeship?

Please select one for each option

(Understanding how human activity is affecting nature)

And how important to you personally is learning these skills, attributes and knowledge during your time at your current place of study or apprenticeship?

Please select one for each option

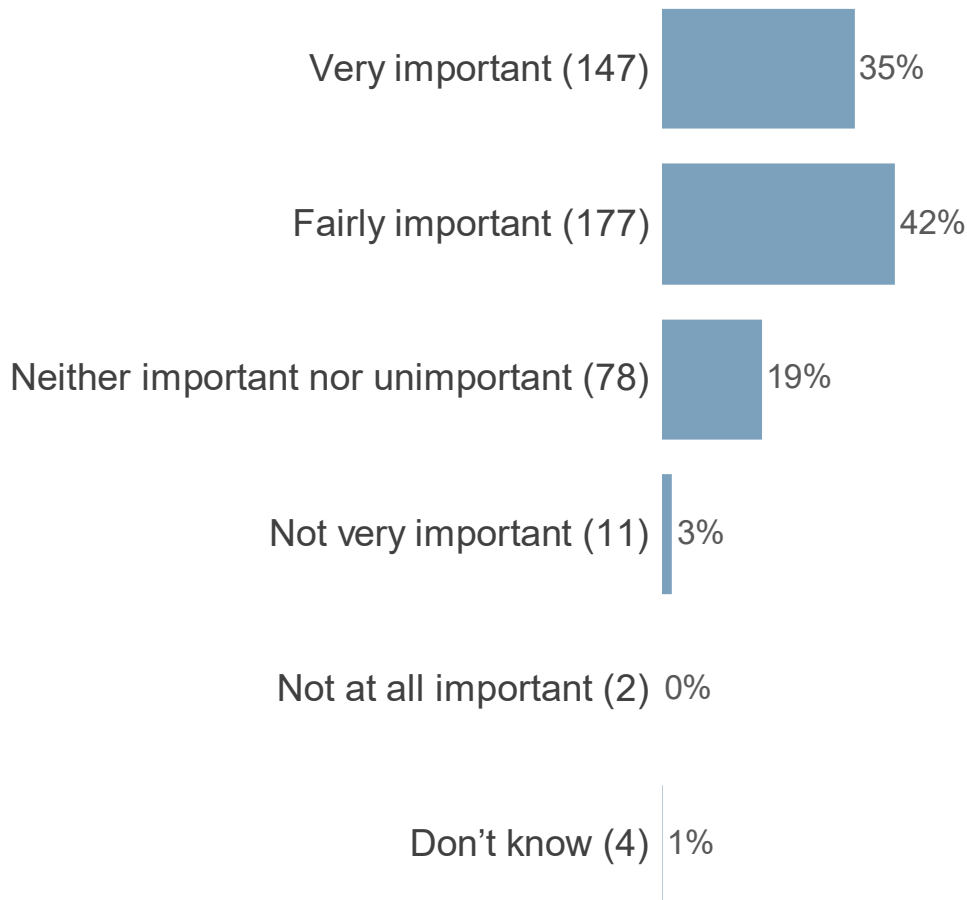

(The causes of inequality in the world)

And how important to you personally is learning these skills, attributes and knowledge during your time at your current place of study or apprenticeship?

Please select one for each option

(Using resources efficiently to limit the impact on the environment and other people)

And how important to you personally is learning these skills, attributes and knowledge during your time at your current place of study or apprenticeship?

Please select one for each option

(Considering ethical issues linked to your subject)

And how important to you personally is learning these skills, attributes and knowledge during your time at your current place of study or apprenticeship?

Please select one for each option

(Looking at global problems from the perspective of people from around the world)

And how important to you personally is learning these skills, attributes and knowledge during your time at your current place of study or apprenticeship?

Please select one for each option

(Challenging the way we do things now (like business, politics, education))

And how important to you personally is learning these skills, attributes and knowledge during your time at your current place of study or apprenticeship?

Please select one for each option

(Looking at a problem using information from different subjects or disciplines)

And how important to you personally is learning these skills, attributes and knowledge during your time at your current place of study or apprenticeship?

Please select one for each option

(Solving problems by thinking about whole systems – including different connections and interactions)

And how important to you personally is learning these skills, attributes and knowledge during your time at your current place of study or apprenticeship?

Please select one for each option

(Planning for the long term, as well as the short term)

And how important to you personally is learning these skills, attributes and knowledge during your time at your current place of study or apprenticeship?

Please select one for each option

(Understanding how to create change)

And how important to you personally is learning these skills, attributes and knowledge during your time at your current place of study or apprenticeship?

Please select one for each option

(Communicating complex information clearly and effectively to different types of people)

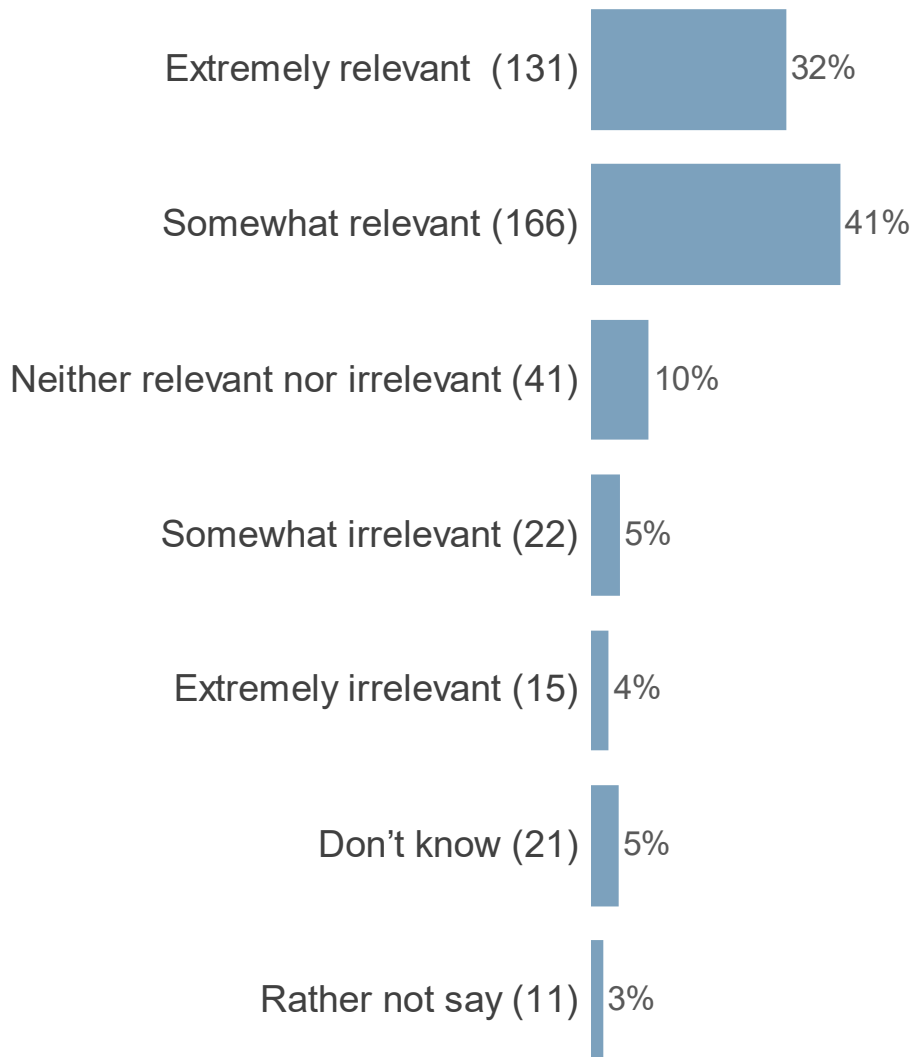

Imagine all courses or apprenticeships are required to include the skills and knowledge needed to help other people and the environment.

What do you think the most relevant way of including the skills and knowledge needed to help other people and the environment within your own course / apprenticeship would be?

Thinking about the skills and knowledge covered in this survey, please select one answer for each option

(Build the material into the existing content in the course)

Imagine all courses or apprenticeships are required to include the skills and knowledge needed to help other people and the environment.

What do you think the most relevant way of including the skills and knowledge needed to help other people and the environment within your own course / apprenticeship would be?

Thinking about the skills and knowledge covered in this survey, please select one answer for each option

(Add a specific module to the course)

Imagine all courses or apprenticeships are required to include the skills and knowledge needed to help other people and the environment.

What do you think the most relevant way of including the skills and knowledge needed to help other people and the environment within your own course / apprenticeship would be?

Thinking about the skills and knowledge covered in this survey, please select one answer for each option

(Run voluntary activities linked to my course)

Imagine all courses or apprenticeships are required to include the skills and knowledge needed to help other people and the environment.

What do you think the most relevant way of including the skills and knowledge needed to help other people and the environment within your own course / apprenticeship would be?

Thinking about the skills and knowledge covered in this survey, please select one answer for each option

(Run voluntary activities for all students (e.g. within the students' union))

Imagine all courses or apprenticeships are required to include the skills and knowledge needed to help other people and the environment.

What do you think the most relevant way of including the skills and knowledge needed to help other people and the environment within your own course / apprenticeship would be?

Thinking about the skills and knowledge covered in this survey, please select one answer for each option

(Offer placements or work experience)

Imagine all courses or apprenticeships are required to include the skills and knowledge needed to help other people and the environment.

What do you think the most relevant way of including the skills and knowledge needed to help other people and the environment within your own course / apprenticeship would be?

Thinking about the skills and knowledge covered in this survey, please select one answer for each option

(Link coursework, projects or dissertations to the issues)

We're interested in hearing more about the different ways of learning the skills and knowledge needed to help other people and the environment you might have experienced. Thinking specifically about your current course, which of the following ways of learning have you experienced?

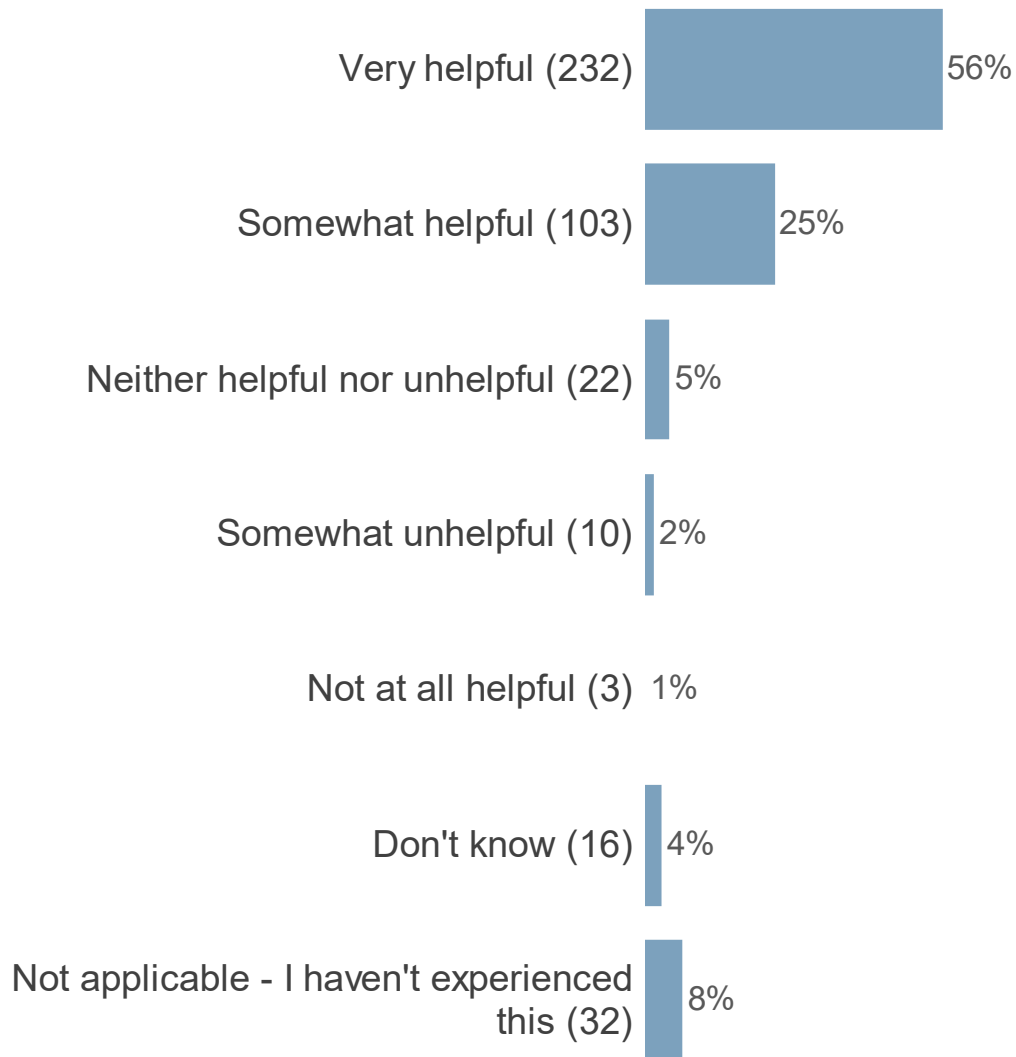

Please select all that apply

And how helpful have you found each of these ways of learning in terms of developing your skills and knowledge on the issues they have involved?

Please select one answer for each option

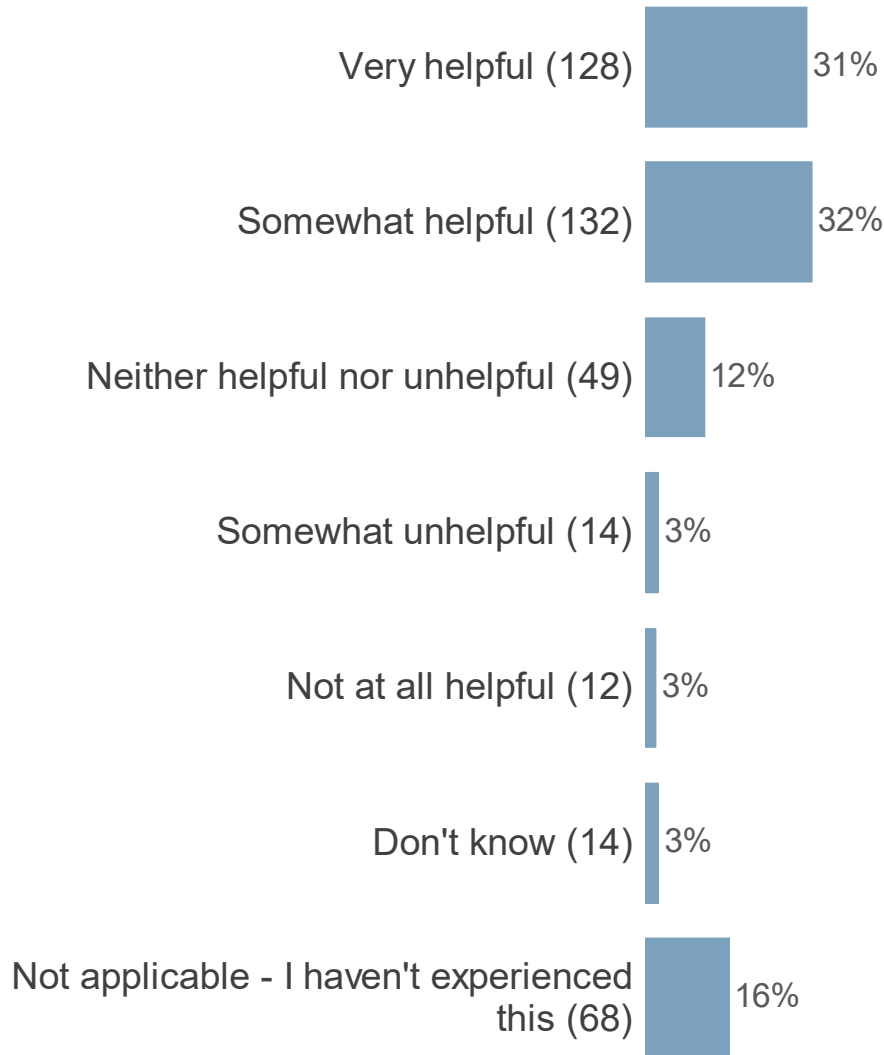

(Case studies: **Real-life examples of local and global issues**)

And how helpful have you found each of these ways of learning in terms of developing your skills and knowledge on the issues they have involved?

Please select one answer for each option

(Stimulus activities: **Providing a prompt (such as a poem, dance, artwork, quotation, piece of music or newspaper article) to stimulate discussion or reflection on a topic**)

And how helpful have you found each of these ways of learning in terms of developing your skills and knowledge on the issues they have involved?

Please select one answer for each option

(Experiential project work: **Experiential, interactive, or participatory activities**)

And how helpful have you found each of these ways of learning in terms of developing your skills and knowledge on the issues they have involved?

Please select one answer for each option

(Simulation: **Activities and projects that simulate real-life situations including role plays, debating, mock trials and gaming**)

And how helpful have you found each of these ways of learning in terms of developing your skills and knowledge on the issues they have involved?

Please select one answer for each option

(Problem-based learning: **Student-led, collaborative work which can be focused on a real-world problem or issue**)

How important do you think the following skills and knowledge are to your future employers?

What do you understand the term 'sustainable development' to mean?

Please write your answer into the box below

Proving natural resources to students

Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs.

Being able to continue to develop the world around us in a way that won't effect the environment

to develop changes in the environment that are not having a negative impact on the environment.

Understanding that some things have negative impacts and adapting and getting rid of those things and replacing them with things that do not damage our environment such as solar panels

It's a realist approach

development which is obtainable to continue in the short and long term

What do you understand the term 'sustainable development' to mean?

Please write your answer into the box below

As organisation and all things for that matter progress long-term, to have 'sustainable development' is to have things in place that can also last long-term whilst still being eco-friendly. This can be anything from resources to extensions to buildings.

the effects of bettering the environment

Unsure

Reuse and recycle

development in the environment to help improve it that is able to have a lasting positive impact and not a short impact

Ways of achieving a better and more sustainable future.

Good healthy development

Carrying out practices in more efficient ways that have a positive impact on the environment

Sustainable development means development for meeting human development goals while also sustaining the ability of natural systems to provide the natural resources and ecosystem services on which the economy and society depend.

developing in good time scale

Making changes that are effective for the long term, that wont damage the environment

It is creating a future or at least set expectations in a way to reduce environment issues in order to have a future. It's taking into account that though we are only ephemeral, our planet is not - was supposed not to be though - but because of us, our planet is dying.

I see sustainable development exactly as it is, development that is sustainable. Progress should be based off of sustainable efforts to create longevity and further social and environmental goals.

Development that allows the world to thrive

Sustainable development is the development which meets the needs of the people without compromising the ability of future generations to meet their own needs.

Development being stable

sustainable development is putting together principles for achieving human development goals alongside sustaining natural systems to provide natural resources on which society depends on.

this is an approach from individual to corporate level towards limiting or preventing adverse weather and climate conditions in the present and future through proactive and reactive ways .

looking after the environment in a way to sustain our future

Progress without harm

To develop an environment and resources that are kind to the earth

Making change that can continue for a decent amount of time - it's manageable

it means the development that helps to meet ends present, without affecting the upcoming generation.

Helping to not hinder future people

Using resources that mean we can continue for the long term

Development that meets the needs of now and not affecting the future needs

development that meets the needs of the present without compromising the ability of future generations to meet their own needs.

being able to develop according to the rest of the world whilst maintaining a net zero carbon footprint and releasing as little waste as possible.

Growing in a way that doesnt harm the environment

What do you understand the term 'sustainable development' to mean?

Please write your answer into the box below

Development that can make an impact long-term without detrimental effects to the world.

Growth which limits its negative environmental and social impact

A consistent growing resolution that it's maintainable with the world and had little negative affect as possible

To improve existing environment and to develop new things without hindering the balance of the environment

developing ways of using sustainable products ore and finding new ones

development that meets the needs of the present without compromising the ability of future generations to meet their own needs.

Mean can re generate naturally

Development that is not damaging to the environment

developing sustainably

To develop in a way that would enable the organisation to thrive now and not destroy itself further in the future.

In the University I am preparing for my future.

For me, it's reuse resources, recycling

Something that can last a long time

moving forwards with training/life but not impacting the environment

Development that can be achieved through means/resources that won't diminish/cause further harm to future generations.

a long-term development

Development in which we can continue to do that does not otherwise negatively impact other things, people, processes, or environments.

I don't know unfortunately

Cba

To achieve your goals while taking care of nature and good social practice.

Developing without harming others or the environment.

Companies being able to develop in an environmentally friendly way

economic development that is conducted without depletion of natural resources.

Trying to adapt and make the world cleaner in order to protect it for the future

Developing a future for students and out generation to make a positive environment and make change to impact our future for the better

Helpful for the environment in the future e.g. reusing things

Improving upon something g but limiting the impact it makes to environment e.g. by using renewable materials

developing sustainably

progressing stably

I don't know

Progressing towards a longer term solution that provides less harm to the environment

Thinking about long term improvement and making plans accordingly

Long term changes that is associated with society

What do you understand the term 'sustainable development' to mean?

Please write your answer into the box below

Long lasting

A principle that encourages human development and sustaining natural resources and ecosystem services to improve the present and future.

Developing sustainable aspects to improve quality of living in the world

a deeper understanding of how to contribute to the environment in a more positive way

There's no such thing as sustainable development at the moment. We're trashing the environment with pesticides, fungicides, and herbicides, and yet blaming carbon for the world's ills - carbon is life. Real sustainable development would exist if greenbelts were kept green all agriculture was organic and regenerative, and people were not fooled by corrupt politicians and NGOs with huge money behind them. Re-using and re-purposing abandoned land and buildings instead of building yet more housing. Constructing all new buildings as multi-use (e.g. no more endless houses - apartments with shops/services on the ground floor), extremely well-insulated (i.e. requiring no heating), and with their own green rooves or solar rooves as appropriate.

I believe it is a way of developing a company without harming the environment

without looking up a definition to me, sustainable development includes trying to use local resources/people to benefit the local area, as well as using recycled material or materials that are environmentally friendly and if need energy this is provide from green energy, something that has little to no impact negatively to the planet

Making your place of work/education better for the environment by making changes to what is already there to improve the environment.

Impact on social, environmental and economical needs for future generations.

Progressing through the thrive of global change through innovation and technology

something that is obtainable overtime without damaging wider structures and making change

No negative effects For long-term use

the development that is conducted without the use of natural resources

Development that can continue for long periods of time

Development that does not compromise the ability of future generations to meet their own needs

good level of development to match the development of the current day

The meet the needs of current generation without affecting the needs of the next generation

When making new things like buildings or new projects, there is a lot of talk about how to make things more sustainable and ecofriendly

Economic development that is conducted without depletion of natural resources

Economic and physical growth of an area without causing permanent impacts to the world, local and global population and the environment.

environmentally sustainable future

Not sure

Progressing something in a way to make it last for a long time with little resources

Development that meets the needs and requirements of the present.

Is development which will effect us now

Orgaisatins not destroying natural resources

The development of the environment and economy without detrimentally impacting the health of the global environment, depleting sources, or compromising future generations.

Progress without impacting the environment

What do you understand the term 'sustainable development' to mean?

Please write your answer into the box below

Growing within an organisation in an environmentally friendly way

It means low-carbon life, clean and high-efficient energy, and saving natural resources for our future generations.

Energy saving

whilreemeeting the needd of human develpoment doing it in a way that has little carbon foot print as possible

Taking a definition of sustainable development as:

“Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs”

To what extent, if at all, would you say that you personally agree with the following statements:

Please select one for each statement

(Sustainable development is something which places of study/apprenticeships should actively incorporate and promote)

Taking a definition of sustainable development as:

“Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs”

To what extent, if at all, would you say that you personally agree with the following statements:

Please select one for each statement

(Sustainable development is something which all courses in places of study/apprenticeships should actively incorporate and promote)

Taking a definition of sustainable development as:

“Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs”

To what extent, if at all, would you say that you personally agree with the following statements:

Please select one for each statement

(Sustainable development is something all course tutors/trainers/training providers should be required to incorporate within their teaching)

Taking a definition of sustainable development as:

“Sustainable development is development that meets the needs of the present without compromising the ability of future generations to meet their own needs”

To what extent, if at all, would you say that you personally agree with the following statements:

Please select one for each statement

(Sustainable development is something which I would like to learn more about)

You said you would like to learn more about sustainable development. Please tell us why you would like to learn more in the box below.

Please write your answer in the box below

This topic has been addressed within the content of my course, however it is a complex matter and there is much more to learn.

Have no idea around the subject

no

I care for the environment, I am also a vegetarian

You said you would like to learn more about sustainable development. Please tell us why you would like to learn more in the box below.

Please write your answer in the box below

Because I am training in a school that I would like to teach a year 12 class about sustainability and the more knowledge I have I can pass onto students.

Because all countries should meet their basic needs of employment , food, energy, water, and sanitation.

To continue to preserve the natural resources effectively.

Love learning

For better present and future

How we can hold governments account

how to make change in healthcare so that it doesnt change

It is relevant in modern society

No Poverty, Zer o Hunger, Good Health and Well-being, Quality Education, Clean Water and Sanitation, Affordable and Clean Energy.

To further increase awareness and to make a positive impact

To improve myself.

As things are getting worse around the globe it's important to know what the main causes behind it are and what regulations and practices we can advocate for to try and mitigate the damage that has already been done

-

I would like to know more, because the more knowledge I hold on this topic ensures that I can positively and confidently teach this when I am qualified as a Teacher.

How it fits into life on a local level.

I would like to learn more about it because it is key that we look after our societies and meet the needs of others with years to come as we cant risk degradation of our key communities.

It will effect me in the future and the future of any family I have

Improve current impacts of capitalism and consumerism on the environment, and to help protect animals affected

i would like to improve my understanding to see what i can do to help

I would like to know how I can personally change things I do to make them more sustainable.

I believe it is important to have knowledge of being sustainable for the future and it is relevant to all areas of work and all should be aware of it

The uni to teach more about it's importance

Current situation in the UK and world problems (War in Ukraine is having a domino effect on majority of the world, JUST STOP OIL on the gantries and their other actions, inflation, helping my community survive and thrive as we are BAME, heatwaves - global warming)

to try and save our planet

So that I can apply my knowledge to my future career successfully and that I would be able to teach others about it.

Because I am aware of only certain aspects of sustainable development but it's not possible until and unless every aspect is covered precisely.

The more we know, the more we can help save our planet for future generations.

It is the most important issue nowadays, which we have to take care of

I think there are many aspects of it and I would like to improve my understanding of it

You said you would like to learn more about sustainable development. Please tell us why you would like to learn more in the box below.

Please write your answer in the box below

I would like to learn more about it to ensure I am doing all in my capabilities to help the development.

As teaching is to inspire the next generation to be sustainable

I feel as though it's not talked about or taught enough.

for better earth

Because it is vital for the benefit of our planet and the human race.

I currently don't know enough about it

I think the more knowledge we have the more passion we will then show in making positive changes to the environment.

about what it is and how to demonstrate it

I hear from lots of sources that it is important, but at times I am unclear as to what exactly it is.

It seems important to the future

so that if there is any things that I can do easily and quickly that i wasnt aware of i can quickly incorporate it on top of the more strenuous and more thoughtful ways of implementing sustainable development

Interesting

It's more and more important, it's effecting everyone's life's more now

I would like more information about sustainable development and how to implement it on my own development as a human in the society

it is something im passionate about

I feel like I am not enough informed about how I could change things. I also feel powerless regarding our future because it seems like only powerful and rich people can really change things (maybe by changing their way of living), and they don't seem to be willing to change any single thing.

I would like to learn more about sustainable development because everything we do has an affect on the world around us. As someone who is seeking a managerial position in the future, I would be making decisions that could directly impact many people. Taking sustainable development into consideration to try and better the future for the next generation is something I value highly.

To improve prospects for my children

how can we apply the principle of sustainable development to meet our need in the school?

As I don't know much about it and would like to know more about how to make it better

It is an important and fundamental aspect of everyday life.

learning more about equitable social enviroment

signpost and module incoporation

I don't have any knowledge on this currently

How HR managers can make chnage in the organisation to promote sustainability and how to promote more inclusivity at the work place and outside of it

im here to make a change. in order to bless my future generation I should work for it now which benefits me and society as well

It's an important issue in today's society

I am thinking about the future generation

no

Ways that everyone can do there bit to help.

Be more diverse

You said you would like to learn more about sustainable development. Please tell us why you would like to learn more in the box below.

Please write your answer in the box below

To be aware of things that are bad for sustainable development and to contribute in any way possible .

What i can do as a mu to help my children

To be able to apply to daily life as well

I think its an important process

How local communities can contribute

As a mature student it is not something I am fully aware of

I would like to learn more about how to achieve this at an individual level, going further than being told to recycle, for example any brands that offer reusable products, products that can be refilled etc.

In any field, without sustainable development, planning would be difficult to execute into action plans

As part of the outdoor industry in which i am a working member of, it is important I learn more, not only to change and improve my own actions but to better teach others. I spend a lot of time teaching in nature so this is very relevant.

I better get this money for all the time this has taken

I think that this is something positive for the society.

Ways in a career where you can sustainably develop and how to bring awareness to the issue.

To understand what I can do or thumb about ways to develop

To look after future generations to ensure that they will still have the same opportunities our generation has

make us more aware

Soo my kids can have a future

To learn about saving the world and how to improve living quality

The world is evolving and I want to understand what is gradually developing such as electric car, education systems etc

Improving everything

I believe it is important to be educated on what measurements are place to increase sustainable development and learn how us as communities can further this.

It is not something I have actively participated in before.

As I want to live in a world where the environment isn't being ruined

i feel that there isn't a huge amount of information regarding every small-day changes / local development / green sustainability i would like to learn more about my local area and what on a personal level i can do. 'We all know to wash at 30 degree and turn our lights out but ascess to easy information like what suppliers of electric are more 'green' , what local business use local / uk products or provide a fair wage to employs if products are made Abroud . investments in 'green' sustainable national ideas and business e.g. donating to projects to continue to there work or making expensive 'sustainable' alternatives cheaper e.g petrol or synthetic fules

Having children is a big priority to me and I would want their world to be better than our own and not worse

It will benefit the future generations who I am hoping to teach one day and if I knew about it, I would be able to teach them too

I think it's important to know

Because it's something I have a personal interest in

id like to know how i can make a difference and change for the better

You said you would like to learn more about sustainable development. Please tell us why you would like to learn more in the box below.

Please write your answer in the box below

I don't feel I know enough about it

To get an idea on how I could incorporate this into my everyday life

NA

What I can do let workplace to he achieve this

Although I have some understanding, I would like to learn more so that I can correctly and most effectively do my part.

Because I want the world to be a better place for future generations to come

Since I got my basic and higher education out of the UK, where our education system didn't value sustainable development.

to understand better how i can reduse my carbon foot print

Do you have any suggestions on what actions you would like to see your place of study / apprenticeship take to improve its performance on sustainable development?

Please write your answer in the box below

Unsure

No

More one-off volunteering opportunities for those who can't commit to a continuous role.

I'd like more one off volunteering opportunities available for those who may not be able to commit to scheduled volunteering.

NA

Specific sustainable development workshops to engage students, as I feel many do not know its significance. If not workshops, perhaps promotional videos or talks from individuals/groups engaged in sustainable development. Connect university with industry and internationally, through sending students out to learn about sustainable development, seeing it in practice. Investing in community projects nationally and internationally, again putting students forward to be involved with/lead projects. Reduce waste on campus, awarding prizes to students who make an effort to be less wasteful (as an incentive).

Healthcare needs to review its use of single use plastics.

University of Worcester is pretty ace as it is, so I'm not sure what they would do in addition to be honest.

More green products in cafes and shops, however they shouldn't be really over priced because of them being sustainable because it will just put students off purchasing it and some students may not be able to afford those high prices.

I would like them to make new students more aware of what they can do to be helping.

The Iron Mill doesn't seem to be very expensive. However, I am having lessons in an old building where there's probably a lot of heat escape. They already use reusable mugs that go to the washing machine and have an industrial boiler.

n/a

no

none

N/A

Perhaps a module dedicated to sustainable development in relation to the subject of study.

Do you have any suggestions on what actions you would like to see your place of study / apprenticeship take to improve its performance on sustainable development?

Please write your answer in the box below

Sustainable energy ideas and sustainable construction (effective use of current buildings and design of new buildings).

Not particularly

Paid placement

no

Just stop oil protesters should be shot

More vegetarian accommodation

On more management & communications.

No, not at the moment..

no

N/A

not really

no

Engage with social media more

Group based discussion study

-

Tips on how we can teach it when we qualify as teachers.

n/a

corpoarte into into course more so students have a better understanding for the future of our planet.

no

H

More information provided within the course.

Perhaps have more societies and groups to involve everyone and make everyone aware

Add or discuss them in lectures

Give us an in-depth understanding of what resources the UK has access to, what is more sustainable and what could be done as individuals and a government/businesses to have a positive impact, also suggestions on how to end the Ukraine war peacefully and increasing national pay

spread the word. Initiatives to help the environment

I would like to see a wider range of disposal units that available for students to sort their waste into on campus (cardboard, food, cans and plastic recycling). They will sort their waste if the choice is there.

One thing I would like to suggest my university is to use as less paper as it could, this would help to reduce deforestation.

Events form city council

N/a

Not sure

Actively encourage students to engage

not sure

As I said I am quite uneducated on the matter so would find it ignorant to pretend that I know how to answer this question.

Do you have any suggestions on what actions you would like to see your place of study / apprenticeship take to improve its performance on sustainable development?

Please write your answer in the box below

No

Additional lectures on sustainability

give the option to go to optional courses and take part in more events maybe in the community that offer it

No

Make sustainable development as a real life engagement to promote safe development as a human.

none

Maybe a sort of club in which you learn how to help (example: Lesson 1, How to recycle things). It may be silly, but beginning with small things may help to understand and motivate people to change their way of living.

Right now, The University of Worcester already does an amazing job with sustainability. It has won multiple awards and they take conscious efforts to better the environment. On my course, I have already had a teacher talk to me about environmental concerns and sustainable development which is why I think that as long as the university keeps doing what it is already doing, then I have no comments on improvement.

by stopping inequality By reducing the accommodation fees for international student.

Not sure

No

organising more programs and training towards sustainable development

modules incorporation

electricity output reduction

More consistency

Making sure any plastic is biodegradable.

More awareness

Not at the moment

not really. optional

make it harder for people to throw away rubbish into the general waste bin and push the importance of recycling constantly on to the students.

None

To reduce any unwanted spending and to implement method that are sustainable

More info on helping future generations

No

I don't understand how sustainable development is done now, I'm focused on my line of study, I leave sustainable development to people who understand it, much as I would expect a painter to not attempt brain surgery.

Do sustainable activity on campus, day of sensibilisation about it,...

Encourage lift sharing

N/A

More seminars, meetings and discussions on this topic would greatly be beneficial

I can't think of anything

No

Do you have any suggestions on what actions you would like to see your place of study / apprenticeship take to improve its performance on sustainable development?

Please write your answer in the box below

Use more renewable resources and avoid waste after hosting large events

fun activities

Celebrate environmental day

More places to study e.g. study rooms for all students

N.a

again, just a small link to local / business that are sustainable also info on what my uni is doing as i have no idea

I do not feel educated enough in the area to make a comment or suggestion to improve my place of study.

less waste/items going to landfill

N/a

NO

More feedback from students

maybe have a small event in the pierson building to show what they do and how students can get involved to help

Maybe offering more opportunities to encourage people to be more eco friendly, similar to cycle to work schemes etc.

no

NA

No

Maybe run a society/club.

not really sure how but would definitely be great for students to get together and do something to promote it

No

les paper copies of work as hand outs

(Colonialism and its influences in the past and today)

What impact, if any, has learning about any of the issues in the previous question had on you personally?

Please write your answer in the box below, thinking about how learning affected your day to day lifestyle as well as bigger changes such as your values and your aims for your future career

It influenced aims for my future career, I become more interested in renewable energy and seeking to reduce climate change through that.

I believe it has made me a more understanding and better person

Makes you realise what's happening in the real world and how things need to change

What impact, if any, has learning about any of the issues in the previous question had on you personally?

Please write your answer in the box below, thinking about how learning affected your day to day lifestyle as well as bigger changes such as your values and your aims for your future career

All of the individual education experiences that I have had in my life have all contributed to my character. I think by taking what I have learned on board, deciding what parts I agree with and disagree with, I have become an open-minded curious thinker. In reality, this has made me quite personable, so I network easily with others and enjoy listening to others' life experiences. I decided to be a barrister because of the people I have met and the unjust experiences that I have learned about over time, I would like to represent others' and tackle injustices in my own small way.

Learning about climate change has helped me to understand how I can do my bit.

My personal values are very much orientated to sustainable living and development. These were in place before I started my current course.

Health and wellbeing led me to become a nurse and social justice is what led me to completing a law degree

Its made me more aware and moulded morals and ethics within me that I will stand by throughout my career and life.

What I have learnt has made me more aware of my day to day actions and more conscious of these actions and the impact that they have.

Be grateful get into something that is beneficial to those and the world around you

IT had a great impact on the small behaviours that I have in my daily life such as limiting consumerism, waste, recycling, not littering forests and beaches, protecting the animals, spreading information, and learning about ways to do things without using plastic bags and sorts. But I think this is very little compared to what needed to have happened by now and I also feel that the most important steps are not in the hands of people like me.

not much, social media has the biggest impact

learning about the industrial revolutions consequences and how disastrous theyve been has made me more aware about how fragile our ecosystems can be and that now human intervention is needed to help the problem we caused

none

learning about ethics makes me more able to understand and refer to them in my dissertation. knowledge about climate change is what has stuck with me the most as i was taught about it the most. more aware of what i can do to help prevent it

It has made me more considerate of the world around me and encouraged me to make greener lifestyle choices where possible

I am not sure

Better understanding of situations in healthcare

It has made me more aware of my surroundings and helped me think about preserving it

Study more

I have become a more accountable and concerned for principles individual

It has made me more aware of world issues.

It affects me a lot in my behave and environment .

Greater understanding of my personal impact on the future

Did things that I can to make better future

It has made me mindful to not needlessly waste resources as I am very fortunate to have access to them. personal experiences have taught me more than the education system

What impact, if any, has learning about any of the issues in the previous question had on you personally?

Please write your answer in the box below, thinking about how learning affected your day to day lifestyle as well as bigger changes such as your values and your aims for your future career

i dont think we have covered enough of the more important things for sustainable development

I have gained knowledge from all of these areas. This can all be applied to my future career

Challenge my mindset and my everyday actions

I was made aware of the life we live in.

Becoming more knowledgeable on all the bad things in the world and their causes has personally moved me to be more progressive in virtually all aspects of my life and has made me more conscious about the torrent of misinformation being peddled by those in power and more empathetic to anyone affected by them

learning about inequality made me want to go into sustainable development and promote bottom up solutions where local people are listened to

Madfe me want to study it more and be able to teach it to people

The learning of this has affected my day to day life as learning about health and wellbeing inspired me to maintain a healthy diet, which includes exercise and a balanced diet.

I think learning about these issues allow personal growth within society as i have a greater understanding of the people around me, environment and business. It has allowed me to have a wider look on life and gain a better perspective to other people when it comes to problem solving and understanding other people's points of view.

It's been helpful

Choices made day-to-day, switching off tap and lights, recycling, resusing, reducing, saving up for more environmentally friendly cars, I've become more aware and encourage my students also to be very partial with resources

made me aware

Climate change effect evrday life and changes can affect future athletes.

There hasn't been much of a difference

I have had my career significantly impacted by cultural diversity and equality, health and wellbeing and biological diversity and nature. I currently work and shadow biology and food lessons within a school and these commonly appear in discussion.

Awareness

Na

I try to consider the environment and my impact on it but a lot of my learning and understanding on these issues has been self taught.

Quite inconsistent across the years, I would need to teach myself more of it

Opens your eyes to the inequalities and problems that surface in the world

Its good to know about the world around you and things you can do to help , its made me a more well rounded person

Cultural diversity and equality has educated me on the importance of understanding that people have different experience based on these differences, but even though we are different each member can contribute in a significant way if you look for it.

Raised ageless and changed my behaviour

not much as theses were mostly skipped past quite quickly so i never got to understand its importance fully untill i researched myself

Be a better person

What impact, if any, has learning about any of the issues in the previous question had on you personally?

Please write your answer in the box below, thinking about how learning affected your day to day lifestyle as well as bigger changes such as your values and your aims for your future career

Being more aware of the environment and climate

It has given me ideas and guide in choosing life style. It also give me ideas and knowledge of dealing with my personal issues of life and how to adjust to any environment I find myself.

I always respect nature and really make sure not to waste what can be used/eaten/preserved.

Learning about the issues stated previously has had a major impact in me. It has helped shaped my opinions on controversial topics and introduced me to topics that people can have different opinions on. Learning about these topics has effected the way I view the world and I do base decisions off of some of these concepts. It has helped shaped me into who I am today.

None

learning has affected my day-to-day lifestyle by enabling me to be more critical in analysing information, professionally curious, and in my ability to reflect more which helps me in better decision making.

it's given me the knowledge to know what i need to do personally to look after the environment

Supported my beliefs and helped me make better arguments

I am more aware of issues in the world environmentally and socially. I try to help out with environmental issues by donating to organisations that help make a change. I try to not prejudge and I am willing to learn as much as possible about different cultures and issues people face.

It has made me more open-minded and I have become more conscious of recycling and my consumerism

None really

the impact it had on me is to be aware and well knowledge of my surroundings.

I try to change habits to ensure a better future for everyone

I'm not sure

As I will be working as a healthcare professional accountability is very important to all the decision I will make and the impact it will have on the service users

Better knowledge of the severity of the way the world is heading.

Made me more aware of the world and the challenges we face.

Allows me too look at my area of study and understand more

More willing to change and help others change

Supports learning for further exploration

Made me more aware of issues i was previously unaware of

I think that biological diversity and nature has had the biggest effect on me personally, as, even though I have since switched to forensic science after the foundation year, I was originally going to do animal biology. Day to day, animals and the concept of nature has a calming effect on me, and I sometimes like to sit and watch animals outside going about their day.

It's good for helping you to think about the world who is around you

Many of these have an impact on health so as a nursing student they are all important

It has made me consider how I consume products, and how I dispose of said products more. For example, if i use something that can be recycled whilst I'm out with no recycling bins, I take that waste home to recycle there. I also think more about sustaining our natural environment, starting at an individual level with my own garden.

It helped me to think big, work smart and care for the people and nature

Gives me more to think about finding direction for my assignments & research

What impact, if any, has learning about any of the issues in the previous question had on you personally?

Please write your answer in the box below, thinking about how learning affected your day to day lifestyle as well as bigger changes such as your values and your aims for your future career

I started to think more about health and nature

I feel more aware of how history can affect people and policies now.

Makes you think about how things have been made or gotten and if it's in a way that doesn't effect anyone or the environment

Understand more about life

Learning about social justice has had a profound effect on my day to day lifestyle. I try to ensure I read a lot about social justice and aim to have a career ensuring that justice is provided.

make me more aware

I think learning about social justice has positively impacted me as I able to become aware of everything that I am lucky to have that other less economically stable and autocratic countries do not have. I am grateful to have my basic human rights fulfilled and to have the opportunity to access free healthcare.

It's sad to see things like "critical race theory" and other woke nonsense being taught. The re-writing of history to say that every aspect of colonialism and empire was bad and that essentially if you're a white person you should be ashamed of your past and who you are is a modern-day form of slavery. You are enslaving the mind and identity of those people targeted, which are largely white people with reasonably conservative Judaeo-Christian beliefs. It's beyond disgusting. The actual truth is that every era in history had its pros and cons, and all people have fallen short of perfection, regardless of their skin colour or where they were born. It's time to stop blaming the current state of affairs on some group or some era in history and take responsibility for your own actions. I grew up in a very large city with a very diverse mixture of people - we encountered virtually no racism other than youngsters calling each other names - and that was of all different ethnicities and backgrounds teasing/mockng each other as kids do anyway. Nowadays, it's being encouraged to look down upon white people, conservatives, religious people (of various faiths), or anyone who believes in real marriage rather than whatever you define it as next. It's utterly ridiculous and leads to absolutely no good.

I think learning about these subjects gives you more education to help develop your understanding of your environment.

Makes me more conscious of my actions

-

unsure

Having the knowledge enables me to identify issues and help

I have taken more care to use less energy and water

I feel like I understand the world better

It's made me more aware about the choices I make and how what I do impacts on those around the world and on the environment, both locally and globally

Health and well-being is very important in my career

NA

Try to be sustainability aware in everything I do

Learning about things such as waste has helped me in daily life to be more eco friendly, e.g. reusing and recycling. Other aspects like human rights and social justice will help to inform my choices, values and decisions in my future career of nursing by ensuring that I am considering these factors for each patient.

I consider a lot of these factors during my studying now

We'd also like to hear more about your experiences of learning linked to climate change.

To what extent do you agree or disagree with the following statement:

**“Through my time in education so far, I've learnt...”
(What climate change is and how it happens)**

We'd also like to hear more about your experiences of learning linked to climate change.

To what extent do you agree or disagree with the following statement:

“Through my time in education so far, I've learnt...”
(What we can do at local and global levels to lessen climate change)

We'd also like to hear more about your experiences of learning linked to climate change.

To what extent do you agree or disagree with the following statement:

**“Through my time in education so far, I've learnt...”
(What our daily lives will look like as a result of climate change)**

We'd also like to hear more about your experiences of learning linked to climate change.

To what extent do you agree or disagree with the following statement:

**“Through my time in education so far, I've learnt...”
(What our jobs will look like as a result of climate change)**

We'd also like to hear more about your experiences of learning linked to colonialism.

To what extent do you agree or disagree with the following statement:

**“Through my time in education so far, I've learnt...”
(Perspectives from cultures around the world)**

We'd also like to hear more about your experiences of learning linked to colonialism.

To what extent do you agree or disagree with the following statement:

**“Through my time in education so far, I've learnt...”
(Perspectives from groups underrepresented in our society)**

We'd also like to hear more about your experiences of learning linked to colonialism.

To what extent do you agree or disagree with the following statement:

**“Through my time in education so far, I've learnt...”
(Perspectives from cultures around the world)**

We'd also like to hear more about your experiences of learning linked to colonialism.

To what extent do you agree or disagree with the following statement:

“Through my time in education so far, I've learnt...”

(How the ways in which I am taught and the content I learn has been influenced by processes like colonialism)

Still thinking about your experiences in education so far, what place where you have studied...

Please select one only

(Acted to reduce it's negative impact on the environment and society the most?)

Still thinking about your experiences in education so far, what place where you have studied...

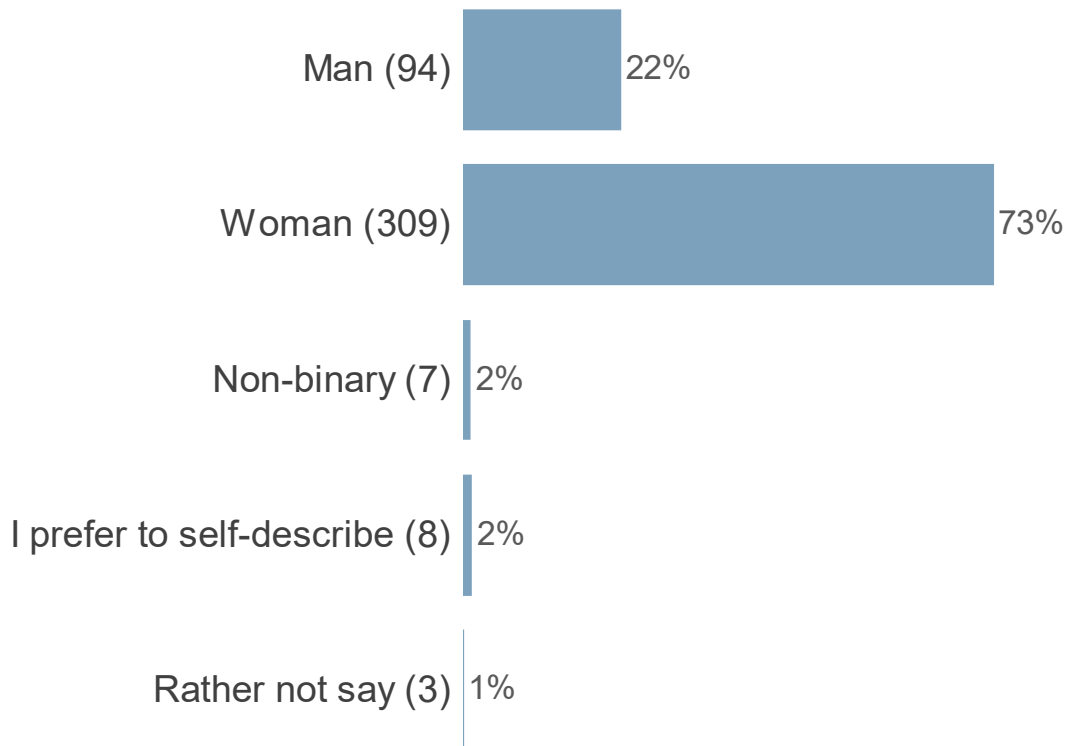

Please select one only

(Encouraged you to think and act to help the environment, and other people the most?)

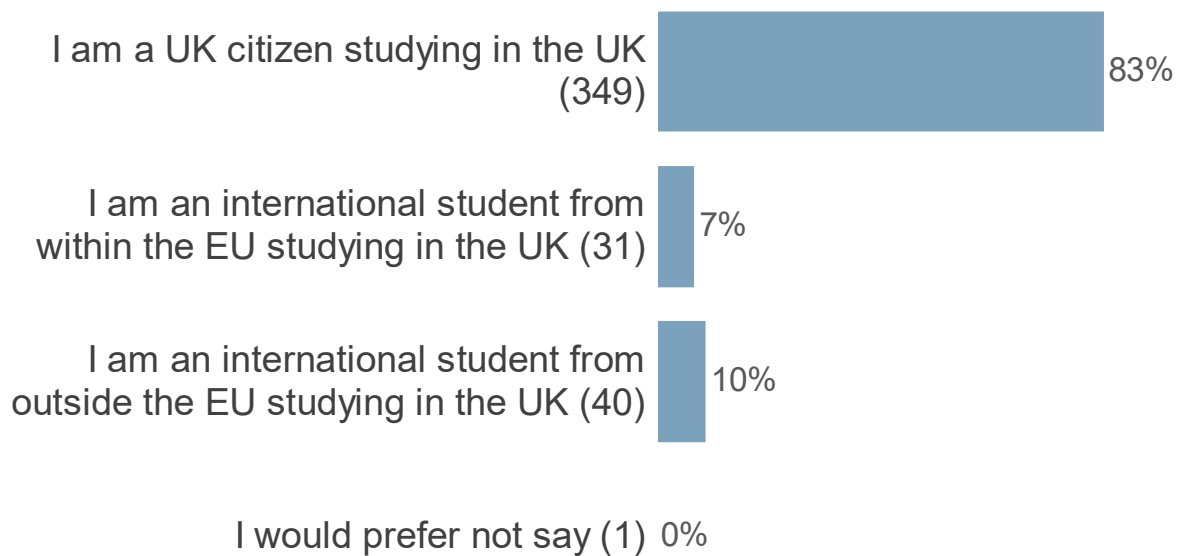

Which of the following best describes how you think about yourself?

Please pick one

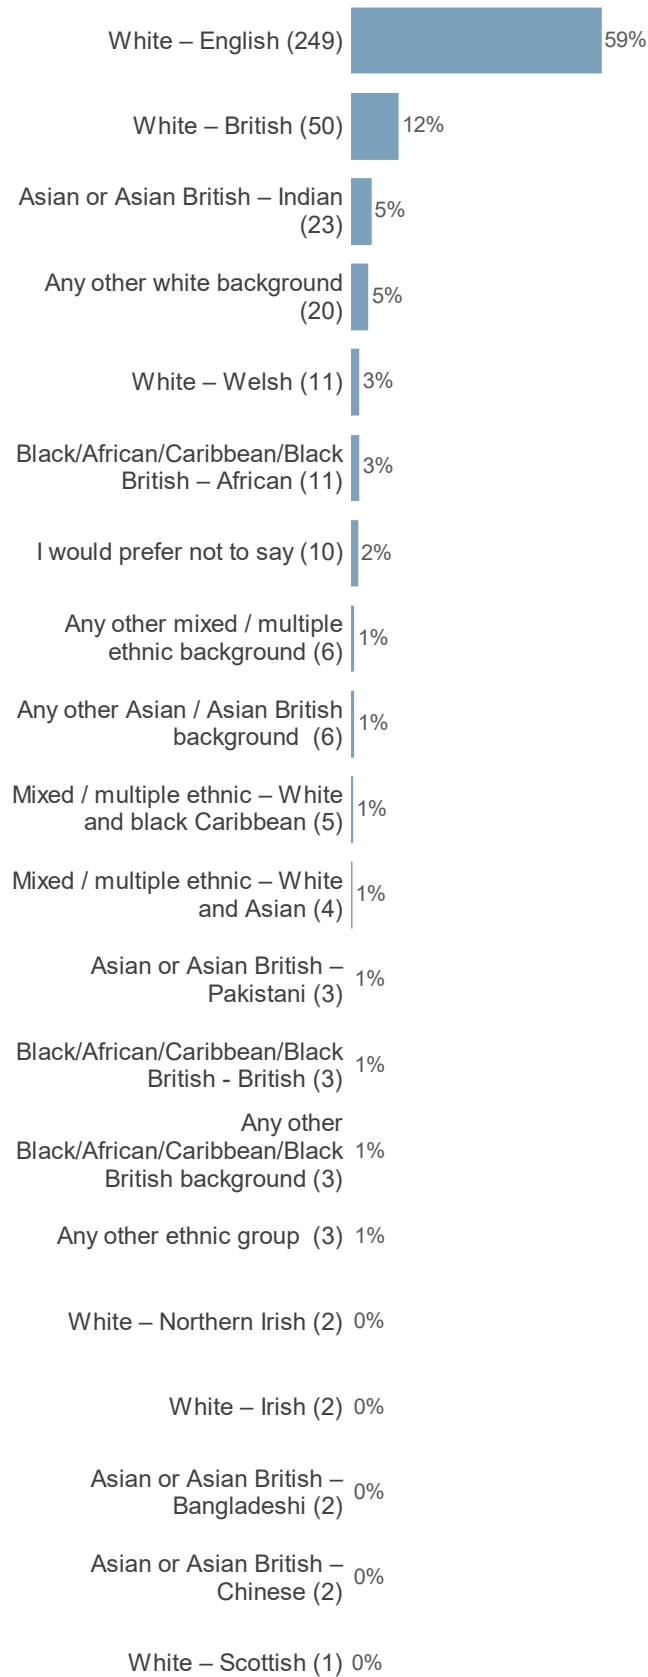

Which of the following statements best describes you?

Please pick one

Which of the following best describes your ethnic group?

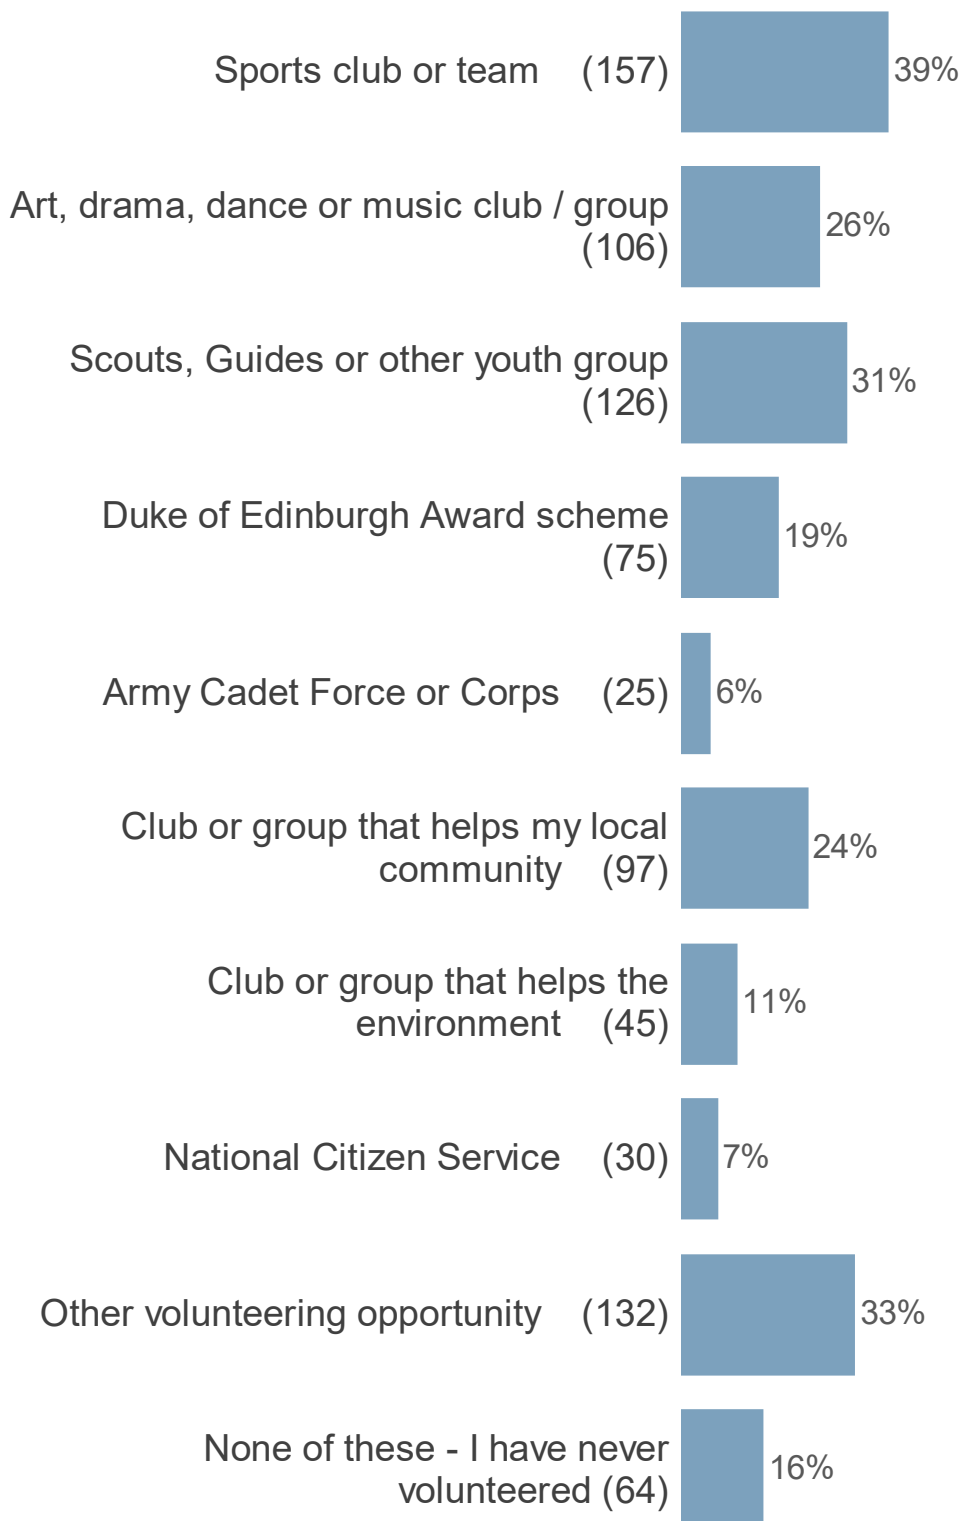

Choose one option that best describes your ethnic group or background

What other volunteering activities, if any, have you ever taken part in?

Please think only about volunteering you have completed outside of formal school, college or university hours

Please select all that apply

If you live in the UK outside of term time, please let us know the first part of your home post code.

We will only use this information for this research and will never send you anything by post as a result of providing this information here.

Please write the first part of your home post code in the box below e.g. NUS' post code is WC1X 8QB so WC1X should be entered.
